

MANVIJAY

I am a senior, majoring in Computer Science along with a minor in Mathematics at State University of New York, Buffalo. As a rising software developer, I'm excited to use my problem solving skills in the technology industry. In my sophomore year, I wrote a research paper on Automation of Sugarcane Processing Plant, which was published in MIBSRC 2017. When it comes to coding, I have good coding experience in Java, C++, C and Angular (HTML, Typescript, C#). Besides my interest in coding, I love to follow all kinds of sports. Currently, I'm interning part-time at Centene Corporation as a Student Associate Developer, until my graduation in December 2018. I'm open to full-time opportunities starting January 2019.
